Cross-cutting Processes

Incorporated Entities

Public agency in charge of issuing rules, instructions, processes and:
- Managing the cross-cutting elements, i.e., those that would be expected to be spent by the ministries.
- Sectoral coordination and the linkage of the plans as a whole with national, international, and local authorities.

The national public investment policy cycle consists of at least four stages:
- Selection
- Involves the prioritization of projects, including the formulation of an investment initiative, carrying out a technical-financial analysis/ex ante evaluation, and the selection of the best alternative solution to a problem.

1. National Public Investment Plan
   - Formulates the national investment policy, determining the objectives and priorities for the national, regional, and local levels and taking into account the different sectors of the State, the market, and civil society interactions.

2. National Public Investment System
   - Consists of a legal framework, methodology, instruments, and tools that support the analysis and decision-making process.
